

Executive Summary

The following analysis is to determine which vacation rental property types in the Manhattan borough of New York City should be targeted for investing. Using data from current Airbnb listings in this area, we have concluded which neighborhoods are most attractive and what size properties (bedroom size) are most popular. The average occupancy rate and days of the week with the highest occupancy rate have been determined, along with the estimated annual revenue for a recommended Manhattan neighborhood. These findings have been concluded from cleaning data, using text function formulas, building pivot tables and creating charts.

Assumptions								
Top 10 most popular neighborhoods for vacation rentals:								
1. Lower East Side		6. Chelsea						
2. Hells Kitchen		7. East Village						
3. Harlem		8. East Harlem						
4. Midtown		9. West Village						
5. Upper West Side		10. Nolita						
Number of bedrooms most popular for vacation rentals:								
1 and 2 bedrooms								
Most popular time of week for vacation rentals:								
Weekends								
Days of the week with highest occupancy rates in order:								
Friday								
Saturday								
Thursday								
Wednesday								
Sunday								
Tuesday								
Monday								
Suggested investment neighborhood: Chelsea(2 bdrm)								
Average price		\$476.26						
Average occupancy rate		71.29%						
Estimated annual revenue		\$123,927.00						

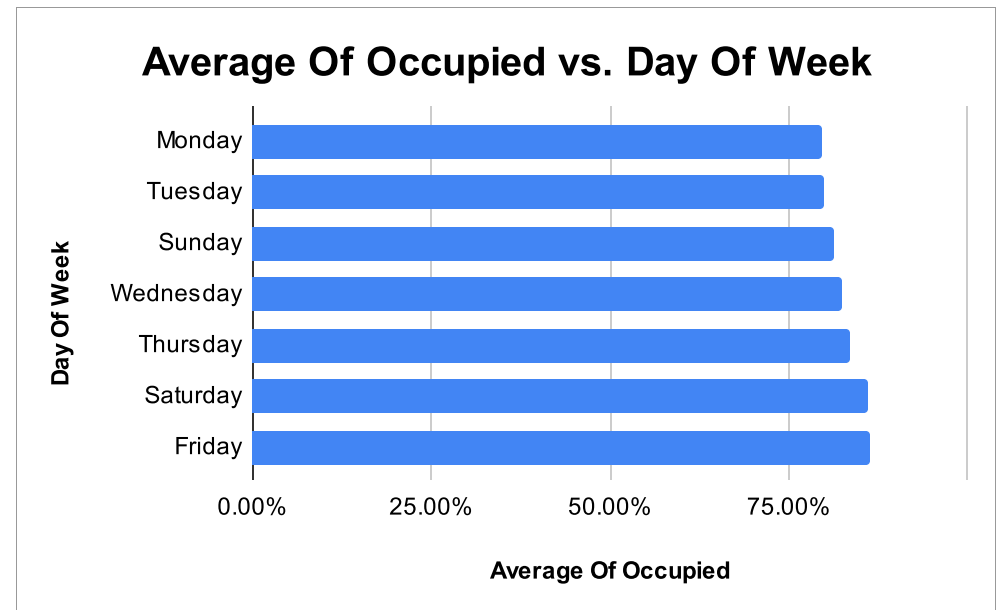

Change Log								
version 1.1- cleaned raw data by filtering rentals with a 7 night minimum requirement and removing rows with inactive listings								
version 1.2-cleaned data labels of neighborhood column sandardizing capatilization into new neighborhood column								
version 1.3- built pivot table to determine top 10 most popular neighborhoods								
version 1.4-created new column for "bedrooms_clean" and use "IFIS" formula to substitute empty cells for 0's								
version 1.5- built pivot table to determine number of bedrooms most popular for rentals								
version 1.6- created new column for "occupied" where values are 1 and 0 are t and f respetively from "available" column using Find and Replace								
version 1.7- created new column for "day_of_week" and utilized WEEKDAY formula from "date" column								
version 1.8- built pivot table to determine the average occpancy for each listing								
version 1.9- built pivot table to determine which days of the week have highest occupancy rate								
version 2.0- created bar chart to show how average occupancy changes based on day of the week								
version 2.1- filtered raw data to show only listings that are Superhosts								
version 2.2- added occupancy rates to <i>listings sheet</i> using a VLOOKUP formula								
version 2.3- built pivot table to calculate average price and occupancy rate for Chelsea neighborhood								
version 2.4- calculated estimate for annual revenue for Chelsea neighborhood
